

OVERVIEW

Microsoft Ltd is looking to venture into the world of movie making and is thus in the process of creating a movie studio segment within the company.

PROBLEM STATEMENT

We have been tasked to:

- To utilize the data provided to perform explorative analysis
- To provide data centric insights to decide the films to create
- To sift through the data and glean correlations

PROJECT OBJECTIVES

- To determine key indicators to success in the movie industry
- Give 3 recommendations on directions that Microsoft Dream Factory(MDF) should
- Present insight into factors that may not have been considered

DATA UNDERSTANDING

The data to be used within this exploratory analysis comes from the following sources

- Box Office Mojo
- ❖ IMDB.
- Rotten Tomatoes
- TheMovieDB
- The Numbers

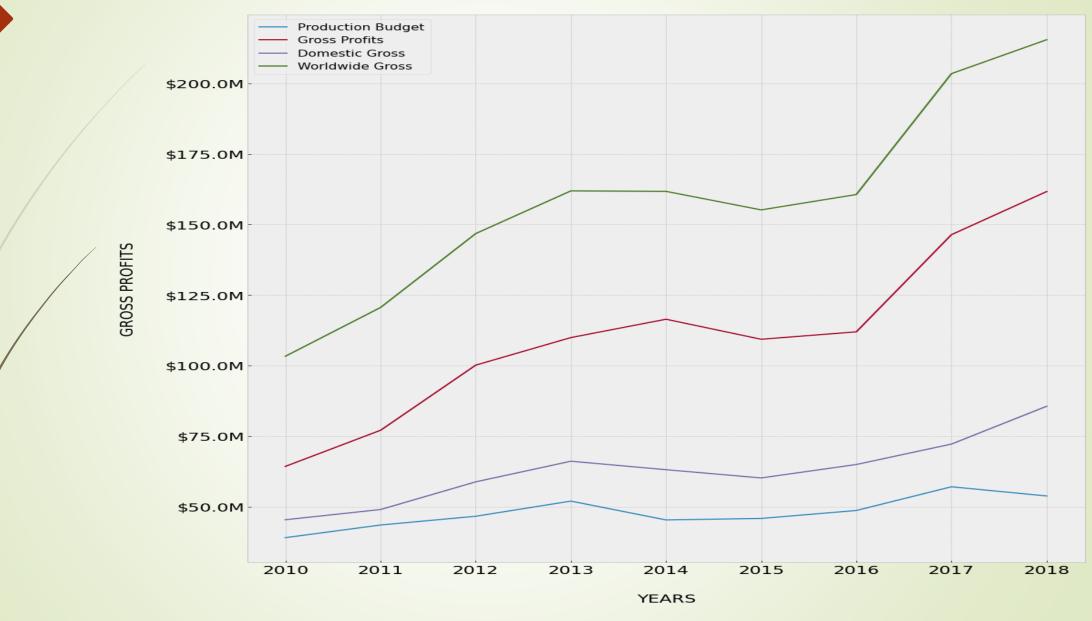

DATA ANALYSIS APPROACH

The approach taken involved the following steps:

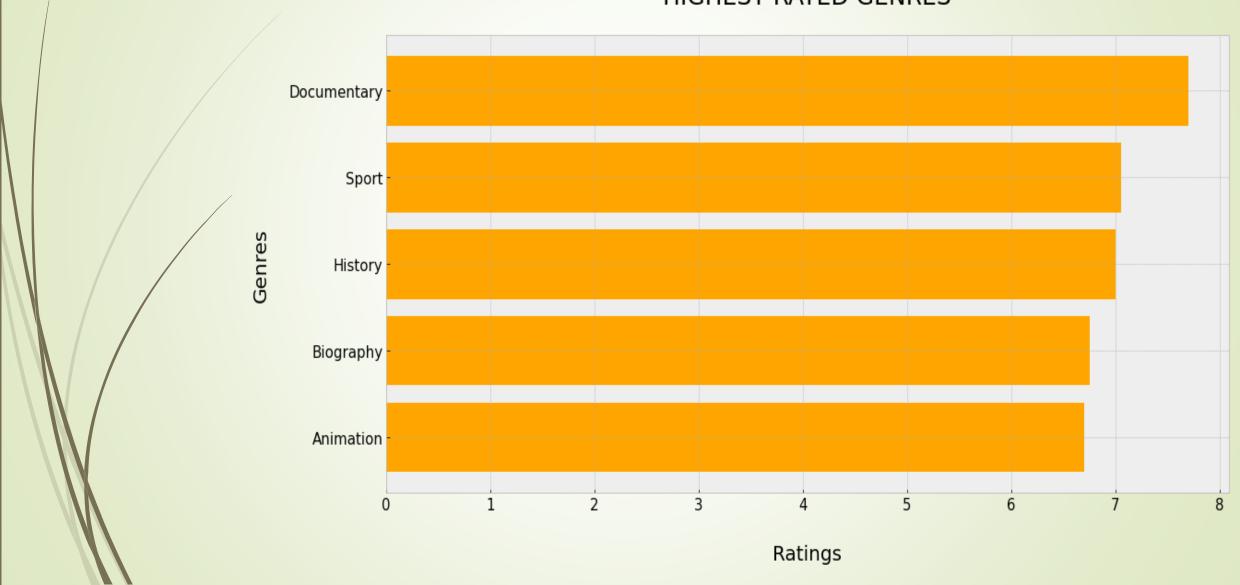

- Data Mining
- Data Cleaning
- Data Analysis
- Data Visualization and Insights
- Recommendations

OBSERVATIONS AND RESULTS

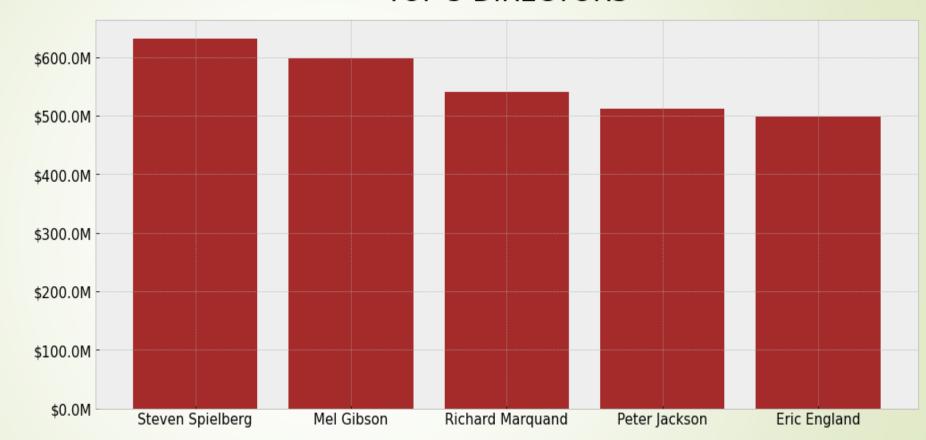

TREND ANALYSIS ON GROSS REVENUE SINCE 2010

HIGHEST RATED GENRES

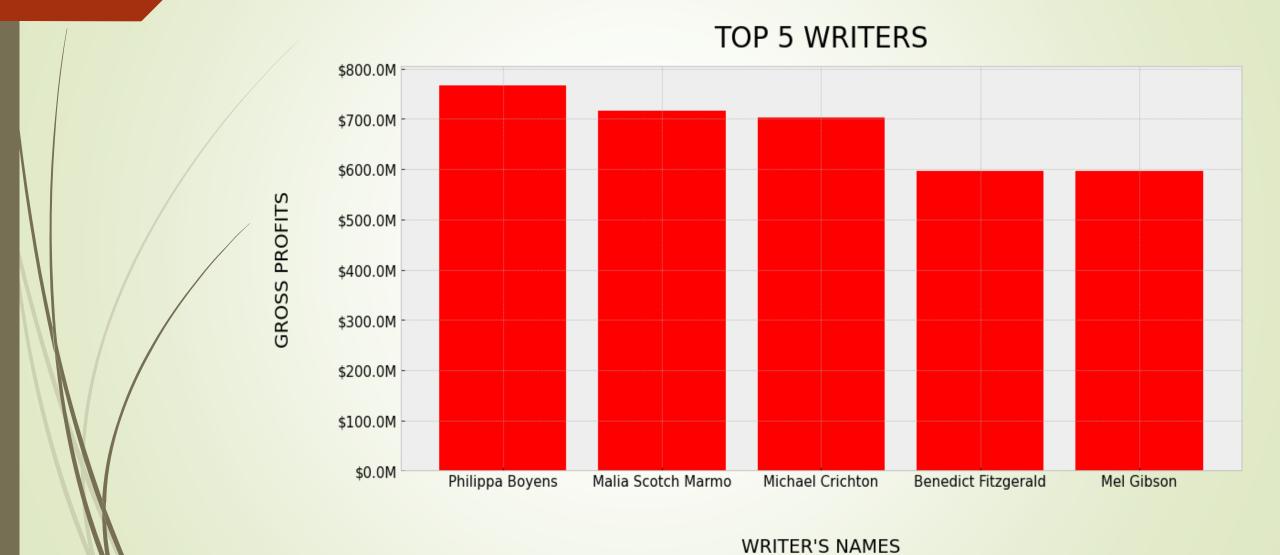

TOP 5 DIRECTORS

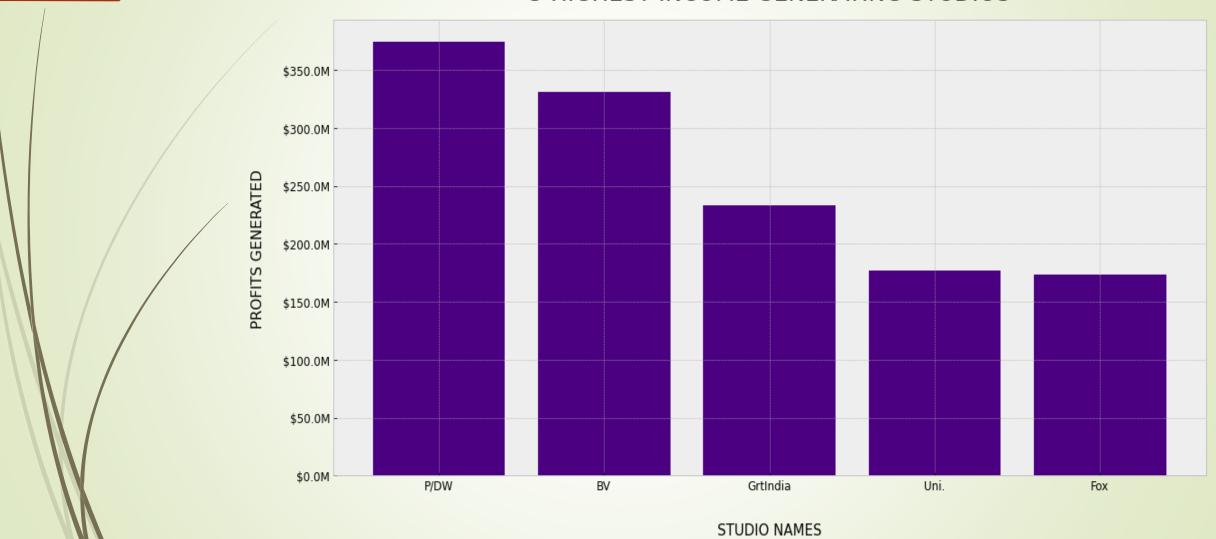

GROSS PROFITS

DIRECTOR'S NAMES

5 HIGHEST INCOME GENERATING STUDIOS

CORRELATION BETWEEN RATINGS AND PROFITS

RECOMMENDATIONS

We recommended that:

- The top rated genres i.e.documentaries, sport, history, biographies and animation will bring in the highest viewer rating
- Emphasis on working with the highest grossing directors and writers to have the highest profit margins
- Benchmarking and partnering with the highest grossing studios like Paramount DreamWorks(P/DW), Bueno Vista(BV) and Universal Studios to grow in global coverage

NEXT STEPS

- Focus further analysis on other key factors for the success of the movie studio such as marketing and cultural impact analysis
- Transfer of all analysis, documents and repositories related to the findings on this project

THANK YOU
